Uses & Benefits

SeaDek® Quality & Innovation

SeaDek non-skid products offer a safe and comfortable alternative to carpet, molded-in non-skid textures, and other marine traction products currently available. Made from UV-protected closed-cell PE/EVA blended material, SeaDek will not absorb water, and is designed to withstand the harsh conditions of the marine environment. Available in a wide variety of colors, thicknesses and textures, SeaDek is fully customizable, and utilizes an acrylic-based 3M™ pressure sensitive adhesive for a lasting bond and easy peel-and-stick application.

As an ISO 9001:2015 certified company, SeaDek manufactures the most innovative non-skid products available, with a devotion to quality manufacturing and customer satisfaction. Trusted by marine industry professionals around the world, SeaDek can be seen on the decks of many of the world's leading boat manufacturers.

Benefits of SeaDek include:

- Exceptional traction when wet or dry
- Unparalleled comfort underfoot
- Shock absorbent
- Protection against scratches, chips, and dents
- Highly stain resistant
- Sound dampening characteristics—ideal for fishermen

There are unlimited uses for SeaDek, including:

|---------------------|-------------|--------------------|
| • Swim platforms | • Trailers | • Coaming bolsters |
| • Cockpits | • Gunnels | • Coolers |
| • Helm station pads | • Footwells | • Poling platforms |

Custom SeaDek

Retail Products

SeaDek has a large selection of retail products available on our webstore, as well as through several authorized SeaDek retailers.

Coaming Bolsters — SeaDek coaming bolsters provide a durable and functional alternative to traditional upholstered bolsters. Utilizing a 20mm material, these coaming bolsters will not absorb water, and are easily applied with no screws or hardware required.

DIY Sheet Material — SeaDek sheet material is offered in a variety of sizes, and features 5mm material in either embossed or brushed textures. Easily cut by hand with a razor blade, SeaDek sheet material is a great choice for projects where a machined finish is not a top priority.

Dek Magic — Specifically made to keep your SeaDek looking like new, Dek Magic is great for fighting tough stains like blood, wine, oil, grease, and more. Dek Magic is environmentally friendly, and safe to use on all areas of your boat, both on and off the water.

Helm Station Pads — Featuring a 20mm dual density material for maximum comfort, SeaDek helm station pads dramatically reduce fatigue caused by long hours on the water. These are available in a variety of color offerings.

Swim Platform & Cockpit Kits — SeaDek has an extensive library of swim platform pads & cockpit kits for most major manufacturers. Simply choose your desired color combination, thickness, & texture, and the pads will be custom made to your specifications.

SeaDek is fully customizable, with virtually endless possibilities for logos, patterns, and designs. While you may always send your own templates directly to the factory, we recommend working with a SeaDek Certified Fabricator or Installer for the shortest lead times and hands-on service.

SeaDek Certified Fabricators are factory trained, and specialize in the entire SeaDek process. They digitally pattern boats, create CAD drawings, cut SeaDek PE/EVA blended material using CNC technology, and install the final products, ensuring the perfect fit and finish. Working with our factory headquarters or a Certified Fabricator, SeaDek Certified Installers capture the boat pattern and install the final product.

SeaDek's network of Certified Fabricators and Installers stretches around the world, with representation across the Americas, Australia, New Zealand, Europe, Asia, and the Middle East.
